THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail

**Mail Stop ISSUE FEE
Commissioner for Patents

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 335 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 335 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

DETAILED ACTION

Response to Amendment

EXAMINER'S AMENDMENT

I. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Amend claim 19 to read:

19. (Amended) A method for routing incoming cellular telephone traffic through a land-based host network to a cellular device user aboard an aircraft, the cellular device user having an associated cellular telephone number, comprising:

receiving, at the host network, a request to register the presence of the cellular device user aboard the aircraft, the request including at least a temporary identification code representing a cellular telephone aboard the aircraft;

the host network advising the cellular device user's home network that the cellular device user is within the operating jurisdiction of the host network;

associating, at the host network, a primary divert on busy instruction with the cellular telephone number, the divert on busy instruction representing an instruction to divert an incoming call to a communication system on board the aircraft; and

considering a current operational state associated with the cellular telephone number as busy, regardless of an actual operational state of the cellular [device] telephone;

wherein, upon receipt of an incoming call to the cellular telephone number, the host forwards an incoming call to the communication system on board the aircraft consistent with the primary divert on busy instruction.

Amend claim 21 to read:

21. (Amended) The method of claim 19, wherein the communication system on board the aircraft is a communication device wirelessly coupled with the cellular [device] telephone aboard the aircraft.

Amend claim 24 to read:

24. (Amended) The method of claim 19, the cellular [device] telephone having at least one original divert on busy instruction prior to said associating a primary divert on busy instruction, the method further comprising:

receiving an incoming call for the cellular telephone number; and

diverting, in response to an actual state of the cellular telephone being busy, the incoming call consistent with the at least one original divert on busy instruction.

Amend claim 43 to read:

43. (Amended) A method for routing incoming telephone traffic through a land-based host network to a telephone device user aboard an aircraft, the telephone device user having an associated telephone number, comprising:

receiving, at the host network, a request to register the presence of the telephone device user aboard the aircraft, the request including at least a temporary identification code representing a telephone aboard the aircraft;

the host network advising the telephone device user's home network that the telephone device user is within the operating jurisdiction of the host network;

associating, at the host network, a primary divert on busy instruction with the telephone number, the divert on busy instruction representing an instruction to divert an incoming call to a communication system on board the aircraft; and

considering a current operational state associated with the telephone number as busy, regardless of an actual operational state of the [device] telephone;

wherein, upon receipt of an incoming call to the telephone number, the host forwards an incoming call to the communication system on board the aircraft consistent with the primary divert on busy instruction.

Amend claim 45 to read:

45. (Amended) The method of claim 43, wherein the communication system on board the aircraft is a communication device wirelessly coupled with the [device] telephone aboard the aircraft.

Amend claim 48 to read:

48. (Amended) The method of claim 43, the [device] telephone having at least one original divert on busy instruction prior to said associating a primary divert on busy instruction, the method further comprising:

receiving an incoming call for the cellular telephone number; and

diverting, in response to an actual state of the cellular telephone being busy, the incoming call consistent with the at least one original divert on busy instruction.

Allowable Subject Matter

II. The following is an examiner's statement of reasons for allowance:

Claim 13 recites a method for forwarding incoming cellular communications to an aircraft with a structure as defined in the specification (pages 1-18) including receiving a request to divert incoming calls for a cellular telephone number to a communication system on board an aircraft, the request including at least a temporary identification code representing a cellular telephone aboard the aircraft; associating a diversion instruction with the cellular telephone number, the diversion instruction representing an instruction to forward an incoming call for the cellular telephone number to the communications system aboard the aircraft; and considering a state of a cellular telephone associated with the cellular telephone number as busy, regardless of an actual state of the cellular telephone; wherein, an incoming telephone call to the cellular telephone number is forwarded, consistent with said considering and in accordance with the diversion instruction, to the communications system on board the aircraft. Applicant's independent claim 13 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Claims 14-18 are allowable based on their dependence of independent claim 13.

Claim 19 recites a method for routing incoming cellular telephone traffic through a land-based host network to a cellular device user aboard an aircraft, the cellular device user having an

associated cellular telephone number, with a structure as defined in the specification (pages 1-18) including receiving, at the host network, a request to register the presence of the cellular device user aboard the aircraft, the request including at least a temporary identification code representing a cellular telephone aboard the aircraft; the host network advising the cellular device user's home network that the cellular device user is within the operating jurisdiction of the host network; associating, at the host network, a primary divert on busy instruction with the cellular telephone number, the divert on busy instruction representing an instruction to divert an incoming call to a communication system on board the aircraft; and considering a current operational state associated with the cellular telephone number as busy, regardless of an actual operational state of the cellular [device] telephone; wherein, upon receipt of an incoming call to the cellular telephone number, the host forwards an incoming call to the communication system on board the aircraft consistent with the primary divert on busy instruction. Applicant's independent claim 19 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Claims 20-24 are allowable based on their dependence of independent claim 19.

Claim 37 recites a method for forwarding incoming telephone communications to an aircraft with a structure as defined in the specification (pages 1-18) including receiving a request to divert incoming calls for a telephone number to a communication system on board an aircraft, the request including at least a temporary identification code representing a telephone aboard the aircraft; associating a diversion instruction with the telephone number, the diversion instruction representing an instruction to forward an incoming call for the telephone number to the

communications system aboard the aircraft; and considering a state of a telephone associated with the telephone number as busy, regardless of an actual state of the telephone; wherein, an incoming telephone call to the telephone number is forwarded, consistent with said considering and in accordance with the diversion instruction, to the communications system on board the aircraft. Applicant's independent claim 37 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Claims 38-42 are allowable based on their dependence of independent claim 37.

Claim 43 recites a method for routing incoming telephone traffic through a land-based host network to a telephone device user aboard an aircraft, the telephone device user having an associated telephone number with a structure as defined in the specification (pages 1-18) including receiving, at the host network, a request to register the presence of the telephone device user aboard the aircraft, the request including at least a temporary identification code representing a telephone aboard the aircraft; the host network advising the telephone device user's home network that the telephone device user is within the operating jurisdiction of the host network; associating, at the host network, a primary divert on busy instruction with the telephone number, the divert on busy instruction representing an instruction to divert an incoming call to a communication system on board the aircraft; and considering a current operational state associated with the telephone number as busy, regardless of an actual operational state of the [device] telephone; wherein, upon receipt of an incoming call to the telephone number, the host forwards an incoming call to the communication system on board the aircraft consistent with the

primary divert on busy instruction. Applicant's independent claim 43 comprises a particular combination of elements, which is neither taught nor suggested by the prior art.

Claims 44-48 are allowable based on their dependence of independent claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
